

## Application Whitelisting - Scripts

- Airlock performs application whitelisting on a wide variety of script types, including PowerShell, MSI, BAT, VBS, JS, SCT, JAVA and HTA files.

### Serious Script Support

Airlock enables your organization to block the execution of unknown scripts with the same level of security and ease as traditional binary files.

Allow script files to execute using a hash value, digital signature or path and query the scripts credibility with Airlock's automated threat reputation service.

Script management is simple with Airlock. No complex HIPS rules or previous application whitelisting experience required.

### Complete Visibility

Airlock provides your organization with the visibility you need to interrogate every script execution.

Discover when and where a script was first seen, including the scripts complete execution history and analytics.

#### Airlock features at a glance

- Centralized reporting** - Real-time dashboards and a comprehensive search / reporting framework. ensures you find the needle in the haystack.
- File Reputation** - Airlock provides an inbuilt file reputation service to help you determine which files are safe to add to the whitelist.
- Exception Management** - Single use codes can be issued to users for temporary time based exclusion.
- Secure** - Airlock monitors all file mappings into executable memory, preventing common application whitelisting bypass techniques.
- Lean** - Airlock's enforcement agent is seven megabytes in size, using small whitelist definitions and next to zero impact on resources.
- Hardened** - Airlock performs enforcement for all users, including administrators. Protections are available to prevent disabling and tampering.
- SIEM Support** - Airlock supports the real-time transfer of all application whitelisting events to third party SIEM solutions.
- File tracking** - Interrogate every file. Discover when and where a file was first seen, including complete execution analytics.
- Intuitive** - Airlock whitelist management is performed via an intuitive file browser interface. No previous whitelisting experience required.

**Airlock makes application whitelisting simple, secure & effective**

Script support in addition to application whitelisting, enables organizations to reach a high level of security. Airlocks purpose built application whitelisting platform, makes whitelisting simple in complex and changing enterprise environments.
